## Education

---

### Sreenidhi Institute Of Science And Technology

Hyderabad, India

B. Tech Computer Science Engineering- Internet of Things CGPA: 7.75

Oct 2022 – Present

- Subjects: DBMS, Operating System, DSA, DCN, OOPs, IOT

### Government Polytechnic Station Ghanpur

Jangaon, India

Electrical and Electronics Engineering (Diploma) Percentage: 80.8

Jun 2019 – May 2022

- Subjects: Mathematics, Digital Electronics, D.C. Machines

## Projects

---

### Intelligent Gas Leakage Detector | Arduino IDE, Python, Firebase

Jan 2024 – Jan 2024

An ESP-32 Microcontroller acting as CPU of the project and the Embedded sensors used to gather data and using various actuators gas leakage detection and controlling and also implemented real-time monitoring of the gas levels using cloud applications.

### ML-Based Diabetic Prediction | Python, NumPy, KNN Algorithm

Aug 2023 – Sep 2023

A seminal advancement in predictive diabetic risk assessment, offering a tailored and data-driven approach specifically designed for women using ML.

### First-Person Exploration Game | C++, Unreal Engine 5, Blueprints

Dec 2022 – Feb 2023

Developed a basic first-person exploration game using Unreal Engine, featuring interactive objects, simple AI, and a dynamic environment. Implemented character movement, collision detection, and a basic UI using Blueprints and C++.

## Technical Skills

---

**Programming Languages:** C++, Java, Python, HTML, CSS

**Database Management:** MySQL

**Operating systems:** Windows, Linux

**Tools:** Git/Github, VS Code, Unreal Engine

## Extra-Curricular Activities/Achievements

---

**Class Representative:** Acted as a liaison between students and faculty, addressing academic and administrative concerns.

**Hackathons:** Participated in national level hackathon-HackSavvy-24, showcasing problem-solving abilities and teamwork.

**Volunteering:** Successfully conducted blood donation, cancer screening, and other health camps across colleges in Telangana state as part of Sreenidhi Cancer Foundation.

**Intern:** Worked as an intern at IRA OM Technologies on power systems - Smart Grid

## Certificates

---

Applications of IOT using Firebase: 

Software Engineering Usage in Product Development:
